Professional Summary

Passionate and detail-oriented BSCS graduate (2025) from the University of Agriculture Faisalabad with one year of industry experience in front-end development. Skilled in modern web technologies and frameworks with a strong focus on creating professional, responsive, and user-friendly websites. Currently learning backend development with Express.js. Adept at problem-solving, teamwork, and continuous learning to deliver high-quality solutions.

Experience

D-Poxy Logics — Frontend Developer (1 Year)

- Developed and maintained responsive websites and applications using HTML, CSS, JavaScript, and React.js.
- Collaborated with cross-functional teams to improve UI/UX, ensuring smooth user experiences and optimized performance.
- Handled day-to-day support tasks related to sales order processing, coordination, and follow-ups.
- Developed software solutions based on client requirements, focusing on development and requirements engineering.

Projects

Benchmark Website: Developed a website for benchmarking system performance. Tools Used: HTML, CSS, React, SQL DB.

Bus Transportation System (React): Designed and developed the frontend for a bus transportation management application using Java. Tools Used: Java, Java Swing.

Health App: Built a health tracking application that allows users to monitor daily activities, water intake, and fitness goals using React and Tailwind CSS. Integrated local storage for persistent data.

To-Do List: A productivity-focused task management app with CRUD operations, smooth animations, and local storage integration for persistent data.

Quiz App: Interactive quiz platform with real-time score tracking, randomized questions, and engaging user feedback system.

E-Commerce Website: Complete online shopping solution built with React.js, CSS, and JavaScript — featuring product listings, cart functionality, and checkout simulation with a fully responsive design.

Educity Educational Website: A modern and dynamic school website built using React.js and CSS showcasing academic programs, faculty details, and admission forms.

Weather App: A visually appealing weather forecast app using JavaScript and OpenWeather API with live updates, search functionality, and intuitive design.
